

Before you build an agent.

Five questions worth answering before the first demo.

01

SWIPE to EXPLORE

What job should it do?

Name a concrete task: answer a product question, gather support details or find an internal policy.

02

SWIPE to EXPLORE

What does it need to know?

Identify the relevant documents, systems and owners. Check whether the information is current.

03

SWIPE to EXPLORE

What can it actually do?

Define permitted actions, approval points and what happens when a request needs a person.

04

SWIPE to EXPLORE

How will you know it helps?

Agree a baseline. Test useful answers, handoffs, error rates, time and operating cost.

05

SWIPE TO EXPLORE

Start with one useful pilot.

Capra can help map the opportunity, build the pilot and plan the next step.
