

The process before the product.

A useful application starts with a clear understanding of the work.

01

SWIPE TO EXPLORE

Who is using it?

Start with the people, their context and the decision they need to make.

02

SWIPE to EXPLORE

What enters the system?

Map the inputs: requests, records, files and the information that makes them useful.

03

SWIPE TO EXPLORE

What needs to happen next?

Make state changes, responsibilities and handoffs explicit.

04

SWIPE to EXPLORE

What happens when it goes wrong?

Design the missing-information, error and recovery states alongside the happy path.

05

SWIPE TO EXPLORE

Make the complicated clear.

Tell Capra about the process you want to improve. caprastudios.co/work.html
