

STUDIO OVERVIEW

Imagination. Made tangible.

A small team of specialists in Atlanta. We build software, websites that move, and AI that earns its keep.

SOFTWARE

Make the complicated clear.

Custom applications shaped around the people using them.
We map the inputs, decisions, states and handoffs, then
design and build the experience.

Understand the work

Actors, inputs and the next decision.

Design the experience

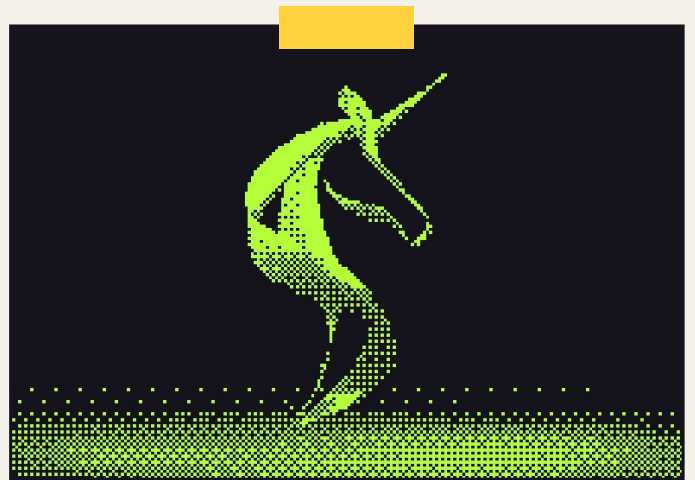

Useful screens, states and handoffs.

Build the application

A focused product around real needs.

Websites with a point of view.

Distinctive web experiences with clear content and purposeful movement. Browser interactions, 3D pieces and brand films give the work a story.

3D pieces. Brand films. Interactive web.

Put intelligence to work.

Chat agents, RAG knowledge systems, customer service agents and connected operations. Map an opportunity, build a focused pilot, and measure before expanding.

01**Discover**

Map the opportunity.

02**Prove**

Build a focused pilot.

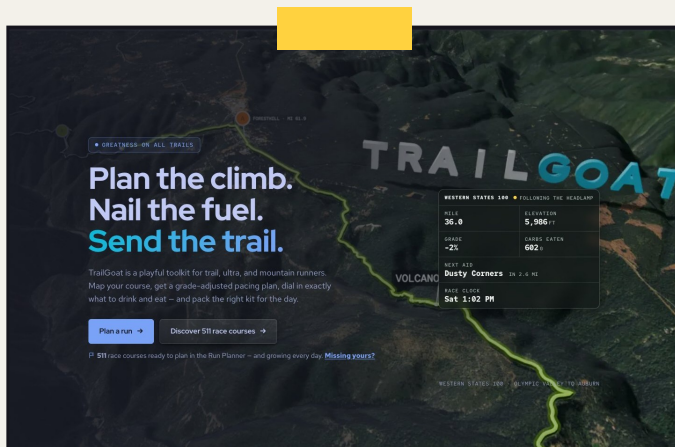

03**Operate**

Measure and improve.

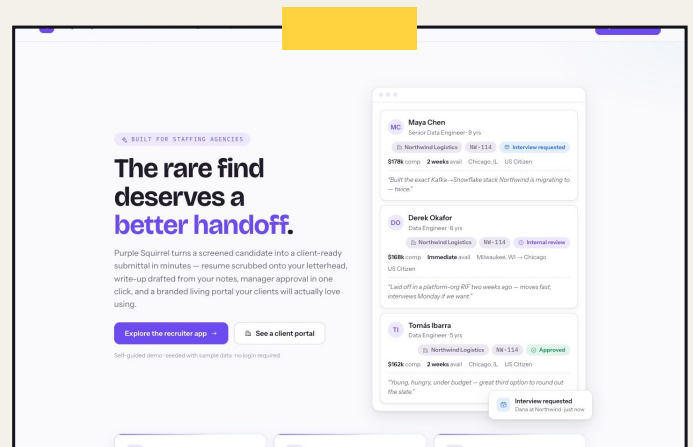

SELECTED PROJECTS

Real work. Clear purpose.

TrailGoat brings course, pace and fueling into a planning tool for trail and ultra runners. Purple Squirrel supports the handoff from recruiter submission to client review.
